The role of Public Health professionals is essential and Public Health training institutions have the critical task of equipping future professionals with the necessary knowledge and skills to navigate the complex challenges at the nexus of climate and health. Join us for this discussion where leading voices from the field will discuss proactive measures public health schools can take to incorporate climate and planetary health into their curricula to ensure this generation of health professionals is equipped to prevent, prepare for and respond to climate related health impacts.

FEATURING:
- **Elena Villalobos**, Technical Officer, Climate and Health Team, WHO
- **Marina Romanello**, Executive Director, The Lancet Countdown on Health and Climate Change
- **Cecilia Sorensen**, Director, Global Consortium on Climate and Health Education
- **Laurent Chambaud**, Senior Climate and Health Lead, ASPHER
- **Jonathan Samet**, Professor, University of Colorado, School of Public Health
- **Margareth Kaseje**, President, ASPHA

Join us and explore the pivotal role of Public Health Training Institutions in shaping a healthier, climate-resilient future!

**WHO SHOULD ATTEND:**
- Public Health Professionals and Educators
- Health Policy professionals
- Community Leaders
